Insulation Boards

Floor Insulation

Modern flooring options provide beautiful and hardwearing surfaces that have an enormous impact on the appearance and comfort of your home. Now you can add the appeal of warmth, creating a cosy home environment all year round.

By laying the Marmox Insulation Board between the concrete slab and the heating system, you ensure energy is directed upwards instead of being dispersed throughout the concrete slab. When used with a quality timer or thermostat, Marmox Insulation Board makes heating more efficient - you'll notice the difference in your power bill, **with proven savings of up to 50%**.

MARMOX

Features & Benefits

- Acts as a thermal barrier and significantly reduces downward heat loss.
- Reduces running cost of radiant floor heating by up to 50%.
- Easy to work with and install into new and existing building projects - over concrete using a flexible tile adhesive, similar to installing large tiles - over timber with glue and screw gun.
- The XPS closed-cell structure is completely waterproof and will not absorb moisture or rot, making it ideal for bathrooms.
- Reduces undertile response time by up to 80%.
- Unique honeycomb finish grips onto plaster, adhesive, screed, etc
- 10mm thick board has minimal effect on finished floor level
- The high compressive strength of the board (30 tons / sqm) ensures the integrity of the floor is maintained.

Warmup has certified installation specialists nationwide, who will be pleased to provide more details on Warmup products and services.
